Software Engineer and Game Developer specializing in C#, Python, and Java. Proven ability to design modular architectures and develop both interactive Unity applications and efficient desktop software. Adept at leveraging data structures, OOP principles, and algorithm optimization to deliver robust technical solutions in collaborative, fast-paced environments.

WORK EXPERIENCE

Game Developer Jul 2025 - Jan 2026

SoloRota, Ankara

I contributed to the development of multiple education-focused casual games, from prototyping to gameplay iteration.
I gained experience in core mechanics, UI/UX flows, performance optimization and player-driven improvements.

EDUCATION AND QUALIFICATIONS

Computer Engineering Sep 2021 - Jun 2025

İnönü Üniversitesi, Malatya

SKILLS

Unity	Experienced
Game Theory	Experienced
Git	Experienced
Python	Experienced
OOP	Experienced
Mobile Games	Experienced
C#	Experienced
Java	Skillful
Desktop Applications	Skillful
Kotlin	Skillful
Computer Vision	Skillful

PROJECTS

MassVCutter – Auto Batch Video Trimming

- A desktop application for automatically trimming intro/outro segments from TV shows and movies.
- Supports video playback, timestamp marking, and batch processing of multiple files.
- Designed with a modular, object-oriented architecture using Java, JavaFX, and FFmpeg.
- Includes manual trimming tools and is planned to support automated audio/visual analysis.

EvoluCat – 2D Unity Metroidvania-Platformer Game

- A 2D platformer where the player controls a cat evolving through intelligence-enhancing drugs.
- The game is divided into chapters, each unlocking new abilities and interactive environments.
- Core mechanics include telekinesis, wall jump, and puzzle-solving.
- It features comic-style transitions, plenty of cats and a multi-slot save/load system.

CampusTycoon – 2D Unity Idle-Tycoon-Management Game

- Designed a complex and scalable idle-economy system that includes lots of production multipliers.
- Built modular gameplay architecture with ScriptableObj, global buff systems, and persistent save data.
- Designed UX flows for player profile setup and upgrade/stats screens.
- Worked on gameplay iteration and feature prototyping based on testing and feedback.
